

Laser Tag:

Specific Things to Know

- Be sure to check the equipment to make sure it works. If not, please notify Prairielands immediately! We recommend charging the rechargeable devices ahead of time.
- Don't store the batteries in the laser guns. It drains them more quickly. Please remember to remove them from the units before boxing up the kit.
- Due to the program's nature, it may require it to take place outdoors or away from the library. Because of this we highly advise utilizing the Teen Program Permission Form, an example of which is provided in this binder, to make sure that the parents of the participants are fully advised of the program elements.

Programming Ideas

- <https://programminglibrarian.org/programs/laser-tag-library>
- <https://pasadena-library.net/teens/2016/laser-tag-at-the-library/>
- Pair with another Teen Programming Kit (Button Maker, Paint Party, Instruments) if you have enough participants to need to take turns.
